LUNENBURG REGIONAL
Community Recycling Centre

Lunenburg Regional Community Recycling Centre (LRCRC) Site users, please note the following changes as of April 1, 2012:

1. The Town of Lunenburg has opted to withdraw from the Unit Partner Waste Disposal Agreement. The Towns of Mahone Bay, Bridgewater and the Municipality of the District of Lunenburg will remain part of the Waste Disposal Agreement after April 1, 2012. This means that as of April 1, 2012, residents and businesses delivering waste from the Town of Lunenburg to the LRCRC will be considered as delivering waste from outside the Waste Disposal Agreement boundaries. Residents and businesses delivering waste which has been generated within the Town of Lunenburg will be charged at **outside rates as outlined below:**

Recyclables (Blue Bag, Paper and Cardboard)	**$270.00/ton**	Note: Minimum Tipping fees will be applied to all waste streams generated by residents and businesses from outside the Waste Disposal Agreement area.
C&D	**$150.00/ton**	
All Other Landfill Material	**$150.00/ton**	
Organics	**$100.00/ton**	
Septage Waste	**$40.00/ton**	

2. Residents and businesses delivering waste from outside the Waste Disposal Agreement boundaries, including the Town of Lunenburg must complete a *Customer Information* form before exiting the Site, unless customer information has previously been gathered and can be retrieved within the scale database. This will be verified using a driver's license or business contact information.

3. Tipping fees for the residents and businesses within the unit partner municipalities of Mahone Bay, Bridgewater and the Municipality of the District of Lunenburg **will remain unchanged**.

4. All residents and businesses using the LRCRC will be asked where their waste was generated and will be asked to show a **driver's license or other identification**. This is to ensure that the correct tipping fees are applied. **Failure to provide adequate identification may result in outside tipping rates being applied to all wastes delivered**. Please show your identification.

5. **All residential and commercial waste streams will be weighed as of April 1, 2012**. No exceptions will be made. This will require site users to provide the scale house with a starting weight upon arrival at the site and subsequent weights as they drop off each of the remaining waste streams. The following waste streams delivered to the Public Drop Off bins will be weighed:

   Recyclables (Blue Bag Recyclables, Paper and Cardboard - one weight required)
   Landfill
   Organics

   All waste streams, with the exception of household hazardous waste, must be weighed in accordance with the LRCRC's Regulations for the Admission and Disposal of Waste, the LRCRC's Provincial Operating Permits and to provide accurate waste volumes information for the LRCRC's municipal partners which operate the site. **Failure to provide weights for the above mentioned waste streams or to follow LRCRC staff direction may result in revocation of tipping privileges.**

6. **Construction and Demolition waste will be weighed separately from landfill to provide accurate information. Contractors will be required to provide a copy of the Building or Demolition Permit issued for the job which they are delivering waste**. If a permit cannot be produced, contractors will be asked to provide other information indicating the civic address where such wastes were generated.

The LRCRC staff and management appreciate site users' cooperation.

Further questions regarding outside rates and requirements for weighing all waste streams may be directed to Management at the LRCRC Administrative Office at 908 Mullock Road, Whynott's Settlement or by calling Operations Manager, Jim Annand at 543-1992. For information about waste separation, please visit the LRCRC's website at www.communityrecycling.ca.
