

Lunenburg Regional Recycling & Composting Facility

Dear Resident

BOXBOARD IS NOW RECYCLABLE!

We are writing to ask for your assistance in moving boxboard out of your green cart and in with your recycled paper products.

Boxboard is the single layered box, which is used for things like cereal, detergent, frozen food, tissues and shoes. It can now be recycled together with other paper products, such as magazines, paper and envelopes. Please fold and put all of these items in grocery bags, being sure to keep them clean and dry.

When you are sorting, please put plastic liners, like those found in cereal boxes, into your bluebag. Soiled boxes still belong in the green cart and if people are accustomed to using boxboard in the bottom of your cart, then continue doing so.

The staff at the Lunenburg Regional Recycling and Composting Facility are very proud of the high quality compost they produce every year. Yet, we can do an even better job, in less time, by reducing the amount of boxboard. This is great news for the gardeners, landscapers and crop producers who rely on the compost to grow healthy food and gardens!

The recycled boxboard will now be sold to make more paper, earning additional money for our facility and the community. Together, we will be taking a win-win approach!

Need compost? Have questions? Don't hesitate to contact us as at 543-2991, by e-mail; recycle@modl.ca or by visiting our website; www.modl.ca.

It's time to think outside the box!

Waste Matters. It's Your Business!

Yours truly,

David Daniels
