

Bridgewater's Vision for a Sustainable Future

The year is 2050...

In the face of global, regional and local challenges, Bridgewater has emerged as a diverse, thriving and healthy community.

Settled on the historic LaHave River, this regional town is a place that brings people together. We prosper thanks to a green, self-supportive economy, in which all people are able to meet their basic needs. Our community, and especially our youth, embrace our achievements, including a complete shift to sustainable and affordable energy, transportation, housing, food, and the responsible use of our natural resources.

Inspired by traditional and new values, we work together to create a community that serves the needs of current and future generations.
